massage and physiotherapy treatments
MASSAGE AND THERAPY TABLES S

SIMPPLICITY on one hand and RICHINES on the other are the two distinguishable features of the renewed S-line design.

Upgraded functionality and continuation of the awarded design make massage and therapy tables perfect support for other massages, physiotherapy treatments and therapies. The new features simplify the use and make tables even more comfortable for both patients and practitioners.

**Stranger control unit**
- new software enables synchronous movement of tables middle two sections
- easier to replace in case of failure

**Hand switch** includes ON button for fully extended position and SOS button for Trendelenburg position.

**Soft retractable system**
- Retractable casters include shock absorber to soften release of caster.

**Circular switch**
- Simple push by one hand
- One handed push down or up
- Horizontal switch

**Table base**
- All plastic cover is screwless for easier cleaning
- Standard 250 kg weight capacity

**Upholstery**
- soft 8 cm thick foam for maximum patient comfort
- Welded and taped stitch around the breathing hole
- wider lying surface due to the paddling finished at a right angle

**Hand section**
- Standard breathing hole with a plug
- Welded und taped seam around the breathing hole preventing the penetration of massage oils and lotions
- Practitioner’s unhindered access with three-part head section
- One handed push down or up
- Adjusts armrests at once
- Retractable system

So the cleaning becomes easier
To ensure simple cleaning and HIGH HYGIENE STANDARDS, the upholstery is made of high-quality imitation leather. The only SEAM around the breathing/breath hole is WELDED and TAPPED to prevent penetration of any liquids, massage lotions and oils in particular. The ABS plastic cover that protects the table base is screwless and thus completely smooth.

The head and leg section adjustment levers with a mechanism integrated in the frame are easier to press and due to black plastic easier to use.

To maximize the comfort and ease the use
To maximize the patient comfort, the 8 cm thick padding is made of two-layer foam that DURABLE AND COMFORTABLE.旁边的 whole lying surface which is now even wider than the paddling finished at a right angle. The breathing hole with memory foam on the edges ensures perfect comfort in prone position. A matching plug is standard too. Optionally, tables can include a THREE-PART HEAD SECTION. With the new mechanism for armrest adjustment, only push by one hand to lower or raise both armrests at once. As it’s integrated in the frame, it allows practitioners unhindered access when they treat patients seated at the head section.

Lowering and raising massage and therapy tables by the new CIRCULAR SWITCH is as simple as it can be. From any side of the table, one can adjust height by pressing the switch down or pushing it up completely effortlessly. The height adjustment range is between 48 and 96 cm. The standard WEIGHT CAPACITY has been increased to 250 kg which contributes to the PERFECT STABILITY.

Practitioners can rely on the table even if they apply strong pressure during treatments. Due to the new software that enables SYNCHRONOUS MOVEMENT of the middle two lying sections, they can position their patients easier and quicker. The hand switch includes two buttons for the prostrated completely flat and Trendelenburg positions and a memory function to store a position of practitioner’s choice. The table stands firmly on its rubber feet. To move the table across the room, it features RETRACTABLE CASTORS. Due to the shock absorber, the relaxing and lifting of the castors is softened.

For various treatments, massages and therapies
The breathing hole in the matching plug and ELECTRIC HEIGHT ADJUSTMENT are now the standard equipment of the renewed S-line massage and therapy tables. Two massage table models offer a wide and COMFORTABLE LYING SURFACE to perform massages and therapies at treatments demand positions with negative section incline to allow the Jackknife or Trendelenburg position. 3-, 4- and 6-section therapy tables models are available.

The fully equipped Therapy table S8 standardly includes a three-part head section and standard foldable side wings integrated in the back section. Both table offer an extra WIDE SURFACE for rehabilitation treatments. Now both our one and two-section model include a HAND SWITCH to adjust the height and set a two-section S8bath the head section as well.
